#### INTENIATIONAL SEARCH REPORT

International Application No PCT/EP2005/051464

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 C12N15/90 C12N5/00

According to International Patent Classification (IPC) or to both national classification and IPC

#### B. FIELDS SEARCHED

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ, EMBASE, BIOSIS, Sequence Search

C. DOCUME	ENTS CONSIDERED TO BE RELEVANT		
Category °	Citation of document, with Indication, where appropriate, o	f the relevant passages	Relevant to claim No.

Form PCT/ISA/210 (continuation of second sheet) (January 2004)

International application No. PCT/EP2005/051464

### INTERNATIONAL SEARCH REPORT

Box II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
2. X Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
see FURTHER INFORMATION sheet PCT/ISA/210
3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This International Searching Authority found multiple inventions in this international application, as follows:
As all required additional search fees were timely paid by the applicant, this international Search Report covers all searchable claims.
2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4: No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark on Protest  The additional search fees were accompanied by the applicant's protest.
No protest accompanied the payment of additional search fees.

Form PCT/ISA/210 (continuation of first sheet (2)) (January 2004)

### FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

#### Continuation of Box II.2

Present claims 1-3, 10, 11 and 16 encompass a mutant filamentous fungal cell defined only by a desired characteristic (the mutant filamentous fungal cell has a steering towards homologous recombination, the mutant filamentous fungal cell has a ratio non-homologous recombination/homologous recombination that is decreased or the mutant filamentous fungal cell is deficient in a gene encoding a component involved in non-homologous recombination). Contrary to the requirements of clarity of Article 6 PCT, these claims relate to a result-to-be-achieved type of definition that does not allow the scope of the claim to be ascertained.

This non-compliance with the substantive provisions is to such an extent, that the search was performed taking into consideration the non-compliance in determining the extent of the search of the claim (PCT Guidelines 9.19 and 9.20).

The description provides support and disclosure in the sense of Article 6 and 5 PCT for a mutant in the hdfA and/or hdfB genes. The search of claims 1-3, 10, 11 and 16 was therefore restricted to the mutants specifically disclosed in examples 2, 3 and 4 of the present application that have the desired property.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.
